Digital 128BW

The Ultimate 128 Channel B/W Ultrasound System

Four chamber view

BPD level in a 19-week fetus

Longitudinal section of kidney

Gallbladder with OHI™

128 BW dedicated to optimum 2D image quality

128BW, the ultimate evolution in black-and-white ultrasound system produces crystal-clear images in fraction of time thanks to 128 channel digital beamforming technology. With its compact and ergonomic design, 128 BW offers the best diagnostic circumstance and spacious location for peripherals.

- **Optimum Image Quality**
 - 128 channel digital beamforming
 - Harmonic imaging
- **3D applications**
 - Free-hand 3D
 - MagiCut™ (Electronic editing software)
 - Surface/volume rendering mode
- **Friendly architecture**
 - Light and compact design
 - Ergonomic designed keyboard layout
- **Digital Image Management and Networking**
 - SonoView™ II Lite and SonoView™ Pro
 - DICOM 3.0
 - MOD
 - LINUX based operation system
